This Screening Exam Represents A New and Unique Concept In Personal Awareness

CT (Computerized Tomography) "Virtual Colonoscopy" Exam Results Pg. 1 of 2

Patient: Doe, John

Referred by: Self Referred

Pt. #: 00001

SUMMARY

Date: 9/27/02

1. Polyp #1 in the sigmoid colon measures 7mm; DFR (Distance From Rectum) is 35cm.
2. Polyp #2 is near the splenic flexure and measures 8x10mm; DFR is 60 cm.
3. Polyp #3 in the transverse colon measures 8x14mm; DFR 85cm.
4. Polyp #4 & #5 are in the ascending colon, measuring 11x26mm and 4x8mm respectively, DFR for both is 115cm.
5. RECOMMENDATION: fiberoptic colonoscopy & resection of these lesions.

INDICATIONS: Evaluate for possible colonic mass or resectable intraluminal polyp (>6mm).

EXAM: A CT exam of the abdomen and pelvis was performed in the prone and supine positions following insufflation of the colon with room air according to the virtual Colonoscopy scanning protocol. This exam is intended only for screening purposes and a clinical correlation discussion of findings with a personal physician is absolutely necessary.

FINDINGS/COMMENT:

e1

**Prep/Inflation
FINDINGS****RECTUM**

The lumen is clear of fluid and/or retained fecal material.
The rectum/ampulla shows no evidence for polyp or mass.

Key Images

e2

**Prep/Inflation
FINDINGS****Sigmoid Colon**

The lumen is clear of fluid and/or retained fecal material.
a 7mm diameter polyp is identified approx. 35cm from the rectum.

Ax. #151

e3

**Prep/Inflation
FINDINGS****Descending (Left) Colon & Splenic Flexure**

The lumen is clear of fluid and/or retained fecal material.
An 8mm x 10mm polyp is identified near the splenic flexure approx. 60 cm. from rectum

Ax. #63

e4

**Prep/Inflation
FINDINGS****Transverse Colon & Hepatic Flexure**

The lumen is clear of fluid and/or retained fecal material.
At midtransverse colon there is an 8x14mm pedunculated polyp approx. 85 cm. from rectum.

Ax. #40

e5

**Prep/Inflation
FINDINGS****Ascending (Right) Colon**

The lumen is clear of fluid and/or retained fecal material.
Two polyps are identified. Both are approx. 115 cm. from rectum. The larger measures 11x26mm and appears somewhat flat. The smaller (on opposite wall, partially hidden by a haustral fold) measures approx. 4x8mm.

Ax. #50

e6

**Prep/Inflation
FINDINGS****Cecum & Ileocecal Valve**

The lumen is clear of fluid and/or retained fecal material.
Cecum is unremarkable. Ileocecal valve has a normal appearance

You undertook this screening exam to assess your major chest, abdominal and pelvic organs for purposes of excluding obvious structural changes that you should know about. This screening exam DOES NOT and CANNOT evaluate the function of your different organs. We urge you to share this report and the accompanying self launching CD-ROM (containing your images) with your personal physician so that together you may weigh these screening results and decide if any lifestyle or dietary changes....plus additional diagnostic imaging or specialized functional organ specific tests are warranted.
